

## Rigid Mooring Buoys

Available as modular, through chain and pad-eye, Norfloat International's comprehensive range of rigid mooring buoys offer a tough, long lasting, cost effective solution to most mooring requirements.

### Features

#### UV stabilised polyethylene

Manufactured from UV stabilised polyethylene, Norfloat International's rigid mooring buoys provide excellent impact resistance. Its low energy surface reduces marine growth significantly which helps keep maintenance costs to a minimum.

#### Foam filled (standard)

The rigid mooring buoys are pressure filled using marine grade polyurethane foam, to a density of 36kg per cubic metre.

#### Mooring solutions

We understand that standard off-the-shelf mooring buoys may not always meet your mooring needs therefore we are able to manufacture bespoke items to suit your requirements.

#### Lettering

Moulded, irremovable lettering can be added during manufacture.

#### Connection

Norfloat International's rigid mooring buoys are available as through chain and pad-eye. The through chain MB800, MB1200 and MB1800 steel is manufactured to fit the mooring chain, ensuring longevity and reliability of chain and buoy.
