

Inflatable Marker and Mooring Buoys

Heavy Duty Inflatables

Norfloat International's A and NB series of inflatable marker buoys and fenders have been used worldwide by fishermen, harbour masters, local authorities, sailing associations and the Ministry of Defence for nearly 50 years. This is testament to the reliability of the Norfloat International product.

Features

UV stabilised PVC

Manufactured from a UV stabilised marine grade PVC, Norfloat International's inflatable buoys will not degrade and become brittle or tacky.

Foam filled

For specialised applications, Norfloat International's NA and NNB range of marker and mooring buoys can be pressure-filled using marine grade polyurethane foam to a density of 36kg per cubic metre.

Heavy duty rope eye

Norfloat International's rope eye is one of the toughest in the world. Designed to withstand the rigours of the Norwegian fishing industry, Norfloat International is the sensible choice for commercial and private users.

Lettering

Irremovable lettering and numbering can be moulded into the buoys at the time of manufacture, making them ideal for beach marking, water enforcement, sponsorship, or anything else that requires permanent marking.

Valve

The Norfloat International valve is reliable, effective and allows easy inflation and deflation. The valve is sealed using a coarse threaded plastic screw, which is impossible to cross thread. The plastic design ensures seawater will not cause corrosion or seizure.

Application

- Navigation • Mooring • Beach marking
- Speed marking • Fenders

Specifications

Product code

NA / NNB marker buoys

Material

Rotationally moulded UV stable marine grade PVC

Foam fill

Marine grade polyurethane

Rope eye

Heavy Duty Solid moulded PVC

Colours

Available in various colours including IALA compliant red, green and yellow. Available in Black, Grey, White, Navy Blue, Royal Blue, Signal Green, Signal Red, Fluorescent Orange and Yellow.

Type	Circle cm	Diameter cm	Buoyancy kg	Foamed kg	Eye Dia mm
