

Spar Buoys

The one piece design of the NN30 spar buoy makes it almost indestructible.

It has a conical ballast end which enables minimal resistance, reducing the risk of failure and drag in surf conditions.

A concrete fill enables the spar buoy to be used in shallow water. In the unlikely event that it is damaged, the polyurethane foam fill will keep the buoy afloat.

A 1nm self-contained light can be added to the buoy using an optional adaptor plate.

In the event of chain wear, the 316 (A4) stainless mooring connection can be replaced.

- UV stable MDPE
- Low energy surface reduces marine growth reducing maintenance costs
- Ideal for surf
- Internal ballast system
- Replaceable 316 stainless mooring eye
- Foam filled
- Optional adaptor plate for lighting
- Bespoke signage can be added

Specifications

Product code	NN30
Material	MDPE
Wall thickness	9 - 11mm
Height	1600mm
Diameter	300mm
Weight	40kg
Volume	105 litres

Although every effort is made to provide accurate information, dimensions and weights may vary slightly. Norfloat International reserves the right to change specifications without notice.
